

WHY CHOOSE PLATINUM SUITE?

- Platinum Aluminium partitioning suite delivers a bold, distinct and streamlined look with its 35mm reveal.
- Available in centre, offset, double glazing.
- Designed for fast and simple installation.
- Interchangeable system for commercial & residential spaces.

WHY IS PLATINUM TRENDING AS A PREFERRED OPTION TO METAL DOOR JAMBS?

In some applications, steel door jambs can't be substituted however there is a now trend in the market to use the Platinum suite instead of metal door jambs for the following reasons:

- Platinum aluminium suites provide a clean and modern finish.
- Steel door jambs need to be painted, they are complicated to order and install.
- The paint doesn't peel off the Platinum suite frame like it does on metal door jambs.
- Platinum is designed with acoustic seals that deliver better acoustics than metal jambs.
- Platinum suite, saves cost and down time, as jambs can be made on site.
- Aluminium can be delivered to site pre-finished and in a much shorter lead time.
